Summary

iOS Developer specializing in building mobile applications using Swift and Storyboard (UIKit). Proficient in designing intuitive user interfaces, implementing Auto Layout for responsive design, and integrating REST APIs. Dedicated to delivering high-quality, scalable applications while continuously improving technical expertise.

Education

Saveetha Engineering College, Chennai

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.2/10

2020–2024

Technical Skills

Languages: Python, Swift, SQL, HTML, CSS

Frameworks: React.js, Node.js

Database: MySQL

Tools: GitHub, MS Office (Word, Excel, PowerPoint)

Concepts: REST APIs, Data Science Fundamentals, Machine Learning Basics

Work Experience

Corporate Trainer

Adroit Technologies Pvt Ltd (Oracle Partner), Coimbatore

Mar 2025 – Feb 2026

Led training for more than 350 college students, focusing on strong conceptual understanding prior to practical implementation. Designed curriculum for two flagship projects and emphasized industry-standard coding practices, real-world problem-solving, and hands-on project development aligned with software engineering workflows. Delivered Data Science training covering Python fundamentals, NumPy, Pandas, machine learning concepts, and model lifecycle using Google Colab. Conducted Node.js backend training covering server architecture, REST APIs, database integration, and authentication concepts before coding. Provided continuous mentorship, code review support, and guided students in improving technical proficiency and debugging skills. Evaluated student projects and ensured improvements aligned with industry standards and best practices. Fostered collaborative learning environments to enhance teamwork, communication, and problem-solving abilities.

Projects

OneCash – Digital Payments

Developed and maintained customer and agent iOS applications for a digital payment platform using Swift, UIKit, and Storyboard. Designed scalable and user-friendly interfaces with Auto Layout and implemented MVVM architecture for better code maintainability. Integrated REST APIs for recharge services, bill payments, voucher systems, and financial transactions, along with secure authentication using JWT and Keychain. Built agent-side features such as KYC verification, commission tracking, and assisted transaction workflows. Integrated payment gateways and implemented push notifications using Firebase and CleverTap. Developed key modules including transaction history, QR verification, digital receipts, and refund systems. Optimized application performance using NSCache and background processing techniques, and ensured application stability through unit testing using XCTest and UI testing using XCUITest. Focused on improving application scalability and responsiveness through efficient memory and network optimization techniques. Collaborated with backend teams to ensure seamless API integration and smooth end-to-end transaction flow.

Certifications

- IBM Certified Python Full-Stack Development
- Oracle Certified OCI Foundation Associate
- Oracle Certified AI Foundation Associate
- Magic Bus – Connect with Work Program (Infosys)
